
Curriculum for level IV

Embodying

The venous sinuses.
Jugular foramina.
Cranial outlets.
Confluence of sinuses.
Occipital, Marginal and Transverse sinuses.
Straight sinus.
Sagittal sinus.
Cavernous and Intercavernous sinuses.
Superior petrosal and inferior petrosal sinuses
Inertial issues of the venous system.
Formative forces and midline.
Fluid dynamics and the fluid tide.
Directing the tide.
The midlines and embryological formation.
Embryology- Embryogenesis.
Tuning in to the midlines.
The motility of the central nervous system.
Ventricular system.
Lateral ventricles and foramen of Monro.
Cerebral aqueduct of Silvius.
Fourth ventricle, medial aperture foramen of Magendie,
Lateral aperture and foramen of Luschka
The dynamics of the third ventricle, ignition and potency.
Ignition process.
